

When you choose an MS Word fillable application a bar may appear at the top of your browser window that states “To help protect your security, Internet Explorer blocked this site from downloading files to your computer. Click here for options...” (see example below).

When you click on the bar a menu will appear. Choose “Download file...” (see below) and the bar will disappear.

After the bar has disappeared choose the application you wish to use again. This time, a dialogue box will appear asking if you want to “Open” or “Save” the file (see below). You may choose either based on your preference.

Repeat this procedure if necessary.
